Volume 263 1992

Contents

Letters to the Editor

Is there a comet cloud around PSR 1257+12?
Chakrabarti, S.K., Krishna Swamy, K.S. L1

A long-duration optical flare on the FK Comae-type star HD 32918 (= YY Mensae)
Cutispoto, G., Pagano, I., Rodonò, M. L3

Cosmology

Multifractal analysis of a cold dark matter universe
Colombi, S., Bouchet, F.R., Schaeffer, R. 1

Solutions in Newtonian cosmology: the pancake theory with cosmological constant
Bildhauer, S., Buchert, T., Kasai, M. 23

Extragalactic astronomy

The magnetic field structure of M 51
Neininger, N. 30

(RN) Continuous reacceleration of cosmic rays in galaxies. An alternative explanation for flat low frequency radio spectra
Pohl, M., Schlickeiser, R. 37

Structure and kinematics of neutral hydrogen gas in the Large Magellanic Cloud
Luks, T., Rohlfs, K. 41

Models and observations of starbursts. I. Methods of evolutionary models and the starburst in M 82
Bernlöhr, K. 54

Is NGC 931 (Markarian 1040) a barred galaxy?
Amram, P., Marcelin, M., Bonnarel, F., Boulesteix, J., Afanasiev, V.L., Dodonov, S.N. 69

Statistical properties of AGN emission lines in relation to the accretion disc model
Dumont, A.M., Joly, M. 75

Erratum: Iron Kα line from X-ray illuminated relativistic disks
Matt, G., Perola, G.C., Piro, L., Stella, L. 453

Formation, structure and evolution of stars

NTT observations of the globular cluster X-ray binary NGC 6712:S/X 1850–086
Aurière, M., Koch-Miramond, L. 82

Spectral evolution of nova V 443 Scuti 1989
Anupama, G.C., Duerbeck, H.W., Prabhu, T.P., Jain, S.K. 87

Semiregular variables of types SRa and SRb. Basic properties in the visual and the IRAS-range
Kerschbaum, F., Hron, J. 97

Accretion disks around T Tauri stars. III. A χ^2 analysis of disk parameters
Bouvier, J., Bertout, C. 113

Photometry of yellow semiregular variables: HR 8752 (=V509 Cassiopeiae)
Percy, J.R., Zsoldos, E. 123

Basic relations between physical parameters of Wolf-Rayet stars
Schaerer, D., Maeder, A. 129

Vibrational stability of an evolved 5 $M_\odot$ star towards higher-order g-modes
Degryse, K., Noels, A., Gabriel, M., Waelkens, C., Smeyers, P. 137

OY Carinae: the secrets of the super-humps revealed
Hessman, F.V., Mantel, K.-H., Barwig, H., Schoembs, R. 147

The outstanding photometric variations of the Ap star HD 7676=VV Sculptoris
Renson, P., Manfroid, J. 161

A period study of AW Ursae Majoris
Demircan, O., Derman, E., Müyesseroğlu, Z. 165

(RN) CCD imaging and spectroscopy in the field of the X-ray pulsar 1 E 1048.1-5937
Mereghetti, S., Caraveo, P., Bignami, G.F. 172

Stellar atmospheres

(RN) Application of the infrared flux method to 3 cool Ap stars (78 Virginis, 52 Herculis A and CS Virginis) and comparison of their energy distributions to model atmospheres
Monier, R. 175

Carbon-bearing molecules in the envelopes around oxygen-rich stars. First detection of formaldehyde in an oxygen-rich circumstellar envelope
Lindqvist, M., Olofsson, H., Winnberg, A., Nyman, L.-Å. 183

The Spacelab-1 very wide field survey of UV-excess objects. III. Analysis of the IUE high-resolution spectra of two very hot sdO stars
Deleuil, M., Viton, M. 190

The near-infrared variation of the magnetic star HD 125248
Catalano, F.A., Kroll, R., Leone, F. 203

The role of sound waves in Be-star winds
Koninx, J.P.M., Hearn, A.G. 208

The 1992 detailed analyses of α Centauri A and α Centauri B
Chmielewski, Y., Friel, E., Cayrel de Strobel, G., Bentolila, C. 219

Stratification of chemical elements in the atmosphere of the Ap star 53 Camelopardalis
Babel, J., Lanz, T. 232

A Ginga observation of the supergiant X-ray binary system 4U 1700–37/HD 153919
Haberl, F., Day, C.S.R. 241

A fine analysis of calcium and iron lines in the spectrum of the subdwarf Groombridge 1830
Smith, G., Lambert, D.L., Ruck, M.J. 249

Diffuse matter in space (including HII regions and planetary nebulae)

Modelling of IR emission of interstellar clouds. I. Emission of isolated clouds and dust abundance variations
Bernard, J.P., Boulanger, F., Desert, F.X., Puget, J.L. 258

Circumstellar and interstellar fullerenes and their analogues
Kroto, H.W., Jura, M. 275

Non-detection of the 1.67 μm band in Hb 5? Implications for PAH-related models
Magazzù, A., Strazzulla, G. 281

Submm/mm observations of the Monoceros R2 cloud core
Henning, T., Chini, R., Pfau, W. 285

Proper motion measurements in the HH 34 jet and its associated bow shocks
Eislöffel, J., Mundt, R. 292

The Sun

Infrared lines as probes of solar magnetic features. I. A many-line analysis of a network region
Muglach, K., Solanki, S.K. 301

Infrared lines as probes of solar magnetic features. II. Diagnostic capabilities of Fe I 15648.5 Å and 15652.9 Å
Solanki, S.K., Rüedi, I., Livingston, W. 312

Infrared lines as probes of solar magnetic features. III. Strong and weak magnetic fields in plages
Rüedi, I., Solanki, S.K., Livingston, W., Stenflo, J.O. 323

Infrared lines as probes of solar magnetic features. V. The magnetic structure of a simple sunspot and its canopy
Solanki, S.K., Rüedi, I., Livingston, W. 339

Determination of force-free magnetic fields above the photosphere using three-component boundary conditions. II. Analysis and minimization of scale-related growing modes and of computational induced singularities
Démoulin, P., Cuperman, S., Semel, M. 351

The solar system

Influx of interplanetary bodies onto Earth
Ceplecha, Z. 361

Major outburst of periodic comet Halley at a heliocentric distance of 14 AU
Sekanina, Z., Larson, S.M., Hainaut, O., Smette, A., West, R.M. 367

Physical and chemical processes

Consequences of rotation in energetics of accretion disks
Dubrulle, B., Valdettaro, L. 387

Magnetized thin accretion disks in active galactic nuclei. A quantitative analysis of field topologies and their dynamic importance
Khanna, R., Camenzind, M. 401

Alfvén wave transmission and stochastic particle acceleration at parallel astrophysical shock waves
Campeanu, A., Schlickeiser, R. 413

Optical properties of dust aggregates. I. Wavelength dependence
Kozasa, T., Blum, J., Mukai, T. 423

The influence of Alfvénic cross and magnetic helicity on the phase space distribution of charged particles. I. The spatial convection term of the anisotropy
Dung, R. 433

Determination of radiative lifetimes in neutral arsenic using time-resolved laser spectroscopy in the VUV region
Bengtsson, G.J., Berzinsh, U., Larsson, J., Svanberg, S. 440

Instruments, data processing, and computational methods

IRIS data merging. I. A solution to minimize the low and intermediate frequency noise
Fossat, E. 443
